Dear Dan:

Our shipment records indicate that four each MP 10406, System One Power Supply (C2 Unit), were overshipped to Requirement No. 2. As we indicated in past correspondence, these four units are required to complete shipment of the same item to Requirement No. 1.

Can you please arrange an internal transfer of these units from Requirement No. 2 to Requirement No. 1? Unless we hear otherwise, we will assume that this is possible and adjust our records accordingly.

Sincerely,

Sid
